# WIRE ROPE LADDERS

<http://www.netting.com.au/products/wire-rope-ladders.html>

For Inspection, Exploration, Rescue & Escape. The Ladders are designed for use in difficult places where a rigid ladder would be impractical. They are so light and compact that one man could easily carry 60 meters or more in a pack. In places where access has been by means of a rope or free climbing, the use of a wire rope ladder will greatly increase safety. They come in standard lengths of 6m, 9m and 15m. Both ends of the ladders are fitted with 'C' clips so that they can be easily joined to make any required length! Each ladder is supplied with a "Trace". This is a 2.5m length of wire also fitted with 'C' clips and may be used for attaching the ladder to a tree, post or whatever.

**Specifications:**

- Rungs: 12mm Diam. Aluminium alloy 150mm wide
- Rung Spacing: 305mm. (1ft)
- Wire Rope: 3.5mm Diam. 6x19 Galvanised 0.5 tonne breaking strain
- Weight: 256g/m. (0.17lb/ft)
- Load required to force rung down wires: ~ 500kg
- 'C' Clips begin to open at: ~ 400kg
- 'C' Clips fail at: ~ 650kg

**Applications:**

Geological Survey, Rock Fishing, Bird Watching, Bushfire fighting in rugged country, Tree Surgery, Rescue Work (mines, cliffs, sewers, silos, holds, etc.), Fire Escape, Well Sinking, Vessel Inspection, Mine Inspection, Cave Exploration, An Escape Facility for crane drivers and other personnel trapped by power failure.
